EMERGENETICS®

MEETING OF THE MINDS

WORKSHOP

Everyone has a brain. How we use it, however, is as individual as our genetic code. The Emergenetics® Profile answers age old questions such as 'Why do they think that way?', 'Why do they want THAT information?', and 'Why can't they just think like me?' While differences often result in conflict, the best teams find that differences are needed and actually contribute to the overall success of the team.

Emergenetics® is based on research that indicates we are born 'pre-wired' with traits to act and think in certain ways, and we modify these traits as we interact with our environment. Our experiences and genetics combine and intertwine to form recognizable patterns. It is an understanding and use of these patterns - taught using the Emergenetics® Profile - that helps you and your team to improve communication, productivity, and morale. This fast-paced, interactive program leads you and your team through a learning process that is customized to meet your needs and ensure the results you seek. Whether you are hiring, training, leading, or interacting with your team - Emergenetics® workshops focus on business issues and improved results.

PARTICIPANT OUTCOMES

- Learn to construct the "perfect" team
- Deliver presentations in a way that connects with every audience
- Creative and comprehensive problem solving
- Enhanced interpersonal communication
- Leadership development
- Value differences
- Assertive communication

WORKSHOP CONTENT

- Emergenetics® Profile for each participant
- 4 Hour workshop
- Customization based on audience members

Please call us for more information about customization and booking!

EMERGENETICS®

WORKSHOP

HOW IT WORKS

Emergenetics®is a self-descriptive test. Each participant answers a series of questions about themselves in an online questionnaire. Responses are scored and presented with a personalized analysis of results.

EEmergenetics®measures seven attributes of personal preference. Four examine individual thinking preferences and three describe preferred ways of behaving. The Emergenetics®metaphor illustrates this:
